ANDOVER SURGICAL CENTER

Andover, MA. Sullivan Construction, Inc. completes the renovations at Caritas Holy Family Hospital in Andover, MA for their new Phillips Bucky Diagnostic FS Standard equipment installation. The primary user is Andover Surgical Center. Sullivan's project team was selected for its experience working in occupied spaces within the Hospital setting, providing a safe working environment for the employees and patients adjacent to the job site. Sullivan's Injections Control Risk Assessment policy was adhered to and managed daily at the job site successfully.

Sullivan Construction Inc. is proud to be in their forty-first year in business. Founded in Cambridge, MA in 1970, the company moved to Bedford, NH in 1980. The Company is active in all major segments of commercial and healthcare construction. They have a dedicated team of highly skilled and experienced professionals. They respond to each project special needs, honor budgets and schedules, and deliver only the highest caliber of construction services. They excel in design/build, construction management and/or bid arrangements, encouraging an "open book" approach to maximize their customer's level of comfort in the pre-construction and construction budget process. They have LEED AP and ASHE member professionals on their staff, who work with their clients that wish to incorporate sustainable value solutions into their project design and construction phases.
